The **Malaria Elimination Group (MEG)** is composed of 45 international experts from 17 countries, convened by the UCSF Global Health Group to elaborate the scientific, technical, operational, economic, and programmatic issues that countries need to consider when pursuing or embarking on malaria elimination. For more information, please visit www.malariaeliminationgroup.org.

The **Global Health Group (GHG)** of the University of California, San Francisco Global Health Sciences is an “action tank” dedicated to translating new approaches into large-scale action to improve the lives of millions of people. Through funding provided by the Bill and Melinda Gates Foundation and the Exxon Mobil Corporation, the GHG’s Malaria Elimination Initiative was established in 2007 to support and enable malaria elimination initiatives around the world. The GHG works with partners, including the Clinton Foundation and the University of Queensland, to support elimination efforts in Melanesia (the Solomon Islands and Vanuatu), southern Africa (Botswana, Namibia, South Africa and Swaziland), and China. For more information, please visit www.globalhealthsciences.ucsf.edu/ghg/.
